

THE BADASS **TON BOSS** MEME

# TONALD TRUMP

IT'S NOTHING TO **QUACK** AT

# DECLARATION

WHY **TONALD**? WHY NOW?

Tonald Trump is the boss meme of TON, the Telegram Open Network. With a mission to make memes Telegram-first, the \$TONALD token aims to help make TON great again by becoming the biggest meme coin of 2024. By doing so, \$TONALD will help bring the next billion users into the Telegram platform and blockchain ecosystem.

# MEET TONALD

\$TONALD is irreverent, much like its inspiration, and has no shame in grabbing other meme coins by the pussy. Current meme coins have become stale, most of them lack a pair of balls, and none of them have orange hair and tiny hands. As \$TONALD states, the crypto way of life is under attack while career jeets and rugpullers sabotage crypto's incredible potential. \$TONALD will take our crypto back!

# MANDATE

## THE **TELEGRAM** OPPORTUNITY

The Telegram messenger app is head and shoulders above its rivals, and yet, the Telegram Open Network (TON) has no clear meme leader. For every rising tide you need a captain to steer the ship, and \$TONALD is that captain. The badass boss of all meme coins on TON.

More than 1 billion people use Telegram every day, and a TON blockchain wallet opens access to instant and global crypto transactions. As Telegram grows its user base, the TON blockchain needs to grow at the same time, but there are no recognisable crypto projects that epitomize and represent the power of Tonchain.

\$TONALD aims to become the face of TON, and the first meme coin new entrants to the crypto market buy once they discover that all their crypto transactions and portfolio management can take place in Telegram. Tonchain needs a strong meme leader to help usher in the next billion users, and \$TONALD has the first-mover advantage.

# USING TON

## WALLETS AND BUYING TONCOIN

The Telegram Open Network (TON), also known as Tonchain, is a relatively new Layer 1 blockchain in terms of global adoption but has been growing rapidly over the last few years, with increasing developer activity and interest in the surging Telegram ecosystem.

Toncoin (TON) is the native currency of TON and is needed to pay for transaction fees on the network. TON is also needed to buy \$TONALD, so the first thing users need is a TON wallet.

A TON wallet is a crucial component of the TON ecosystem, specifically designed to manage, store, and transact Toncoin. This digital wallet is essential for enabling interactions within the TON blockchain, providing users with a secure and efficient way to utilize the network's various features.

The TON official website recommends Tonkeeper or the Wallet bot within Telegram for those who might be new to crypto, and there are several TON wallet options to choose from depending on your specific needs and preferences.

# TON WALLETS

## OPTION 1: **TONKEEPER**

Tonkeeper is a comprehensive wallet designed for secure management of cryptocurrencies and NFTs. Ideal for users who frequently interact with TON apps, it provides a perfect blend of security and user-friendliness.

## OPTION 2: **@WALLET**

A custodial wallet such as the @wallet bot on Telegram is an excellent choice for those preferring a more managed approach. It simplifies the crypto management process and is user-friendly.

This integration with Telegram is significant, leveraging the messaging app's vast user base to integrate blockchain and cryptocurrency into everyday digital communication. Since the @wallet bot is a custodial wallet, Telegram will manage all storage needs for the assets you invest in or trade.

# PRESALE

## SEND **\$TON** RECEIVE **\$TONALD**

The first thing you'll need to do in order to transact on TON is fund your new wallet with Toncoin (TON) tokens. Use the bank card options within your wallet app or send Toncoin to your new TON wallet from an external wallet or exchange.

The presale phase of \$TONALD is crucial, designed to establish a robust community foundation and raise funds for an elaborate marketing campaign that champions the project as the new face of Telegram and TON.

During this stage, interested investors need only send TON tokens to our presale wallet to ensure their allocation at a rate of 690 \$TONALD per 1 \$TON token. Simply open your funded TON wallet and send TON tokens to this verified address:

UQD\_eP8E7UIC-2btdJtN8WRnNyyfhV1ys3OvRkuXX\_3qRDwJ

Once the presale is over, \$TONALD tokens will be airdropped to all participating wallets. The presale provides early supporters with an advantageous entry point, before the volatility of exchange trading and new listing hype grips the market.

# TOKENOMICS

## 6.9 BILLION IS THE MAGIC NUMBER

The \$TONALD tokenomics are designed to sustain and grow the Tonald Trump for Meme Boss of TON Campaign. With a total supply of 6.9 billion tokens, the presale aims to raise funds with a clear allocation strategy for extensive marketing, bridging between blockchains, community incentives, liquidity provision, and more.

Fund	% of Supply	Tokens
Presale	15.00%	1,035,000,000
Marketing	23.00%	1,587,000,000
Bridging Funds	30.00%	2,070,000,000
Community Rewards	15.00%	1,035,000,000
Exchange Listings	9.00%	621,000,000
Liquidity	8.00%	552,000,000
<b>Total Supply</b>		<b>6,900,000,000</b>

# ROADMAP

## **PRESALE:** Campaign Contributions

The Tonald Trump campaign's first focus is to gather the \$TONALD community and establish our mandate to take over TON and the Telegram ecosystem. A fair presale establishes a strong community.

## **PRE-LAUNCH:** Campaign Marketing

During the presale phase we will initiate widespread marketing attacks on every visible area in crypto highlighting why \$TONALD and the TON blockchain will gain mass adoption through Telegram.

## **LAUNCH:** Exchange Listings

Upon launching on DEX, the \$TONALD campaign team will ensure ample liquidity for high-volume trading and foster a fertile environment for organic and paid CEX listings.

## **POST-LAUNCH:** Total Domination

As the boss meme of TON, the only future for \$TONALD is to become the flagship meme coin on the Telegram Open Network, and the first meme encountered by Telegram's ever-growing user base.
